Rx D3 Forte

Palatable Source of Pure Cholecalciferol

Net Wt. 2 Fl. oz (60 ml)

Amount per 1.0 ml:

Vitamin D3 (as cholecalciferol)	15,000 IU
Per one drop	500 IU

Inactive Ingredients: MCT Oil

Recommended Usage:

Vitamin D3 testing with VDILab.com is recommended to establish a safe and effective dosage. Retesting in 8-10 weeks to ensure Vitamin D3 sufficiency is also recommended.

Rx D3™ Forte contains cholecalciferol, the precursor to Vitamin D3 for all animals. The cholecalciferol is blended with MCT oil. The cholecalciferol is blended with MCT oil at a higher concentration than the standard Rx D3. This provides 5 times the potency per drop to better suit the needs of the severely vitamin D3 deficient patient, the larger patient, or any other patient that would benefit from a higher concentration. Rx D3 Forte comes with a glass graduated dropper to facilitate accurate serving size.
